# **Stock Based Compensation**

The Company recognizes compensation expense on stock options granted to both employees and non-employees using the fair value method at the date of grant, which the Company records as an expense ratably over the vesting periods. The stock option compensation expense is calculated using the Black-Scholes Option Pricing Model.

Stock option compensation expense for the three months ended June 30, 2009 and 2008 was \$81,000 and \$496,000, respectively. Stock option compensation expense for the six months ended June 30, 2009 and 2008 was \$81,000 and \$585,000, respectively.

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options.

# c) Warrants

At June 30, 2009, the Company had no warrants outstanding.
